## PERSONAL PROJECTS

### CONTACT KEEPER APP

- It is a MERN stack web application that has the CRUD functionality to add, delete and update contacts and also has the Mongo database to persist the data.

### News-Letter Signup

- It is a news-letter signup page that uses MailChimp API for collecting user data through an express.js server.

### Todo-List App

- It is a basic Todo-list app using express and mongoDB having CRUD functionality which helped me understand fundamentals of API development.

### Github Finder app

- It is a react application which uses Github API and provides functionality to search github profiles and also display a profile page with user information fetched from the API.

### Official club app for dit university (In Progress)

- Centralised platform for all the clubs that are running in the college for making the process of event registration robust and smooth.

## CERTIFICATES

### The complete 2020 web-development bootcamp (06/2020 - 07/2020)

A course offered by Dr. Angela Yu which helped me learn core concepts of web application development including technologies like node, express, etc.

### TCS - Career Edge Knockdown the Lockdown (04/2020 - 05/2020)

A course offered by Tata Consultancy Services training on soft skills, Interview skills, and IT foundational skills.
